## ECO2PROTECT

- **ECO2PROTECT** is a wood stain of natural origin. It is provided for unpainted surfaces and is colorless.
- **Effects observed during our trials:**
  - ECO2PROTECT forms a protective layer in the first mm of the surface of the wood as a result of a reaction between chitin of the product and cellulose of the wood,
  - Has antifungal and antibacterial properties,
  - Is sun and rain resistant, pores are filled and the wood continues to "breathe",
  - No negative effects observed.
- **Composition:** Made from natural chitin. A dose can be mixed with 1 liter of water. Stir well before and during use.
- **Instructions:**
  - Carefully clean with a pressure cleaner, lightly sand as needed and dust-free,
  - Apply with a soft brush or nozzle, possibly repeat after 24 hours.
  - 1 liter is good for about 10 m<sup>2</sup>; it depends a lot on porosity.
  - See also on label.
- **Note:** Stir well before use. Close pot well after use.
- **Safety:** Read and follow the instructions of this product sheet and the label. Product not harmful for the environment. Not suitable for consumption. Avoid eye contact and after eventual eye contact rinse with water. Ask Material Safety Data Sheet if necessary.
- **Storage:** dry, at room temperature and protected from direct light.
- **Shelf life:** No expiry date for the dry product, but preferably use up to a year after opening. Use the solution within 7 days.
- **Packaging:** 15 gr. in a paper poche.
- **Producer:** see here above.
